

FILTER DRIER *charged with* TRACER WAFER®

QUICKLY FIND THE EXACT SOURCE OF REFRIGERANT LEAK

SAVE TIME IN YOUR NEXT SERVICE CALL

Quickly finds the exact source of each and every leak

Conserves expensive refrigerant and fluids

Very small, multiple, and intermittent leaks are easily found

A system can easily be rechecked after repairs are completed

Technicians can safely search near moving parts

Ideal for preventative maintenance and diagnostics

Features:

- Filter Drier Charged with Spectroline Tracer Wafer® impregnated with Fluorescent Dye
- Approved by all leading Compressor & Refrigerant manufactures
- Compatible with all Refrigerants
- Proven technology: Over 250 million systems installed to date

How It works?

- Dye dissolves and circulates in the system
- Dye escapes with the Refrigerant during leaks
- Exact point of leak is easily visible by UV Flashlight
- After repair wipe off Dye using a Glow Away cleaner

UNIVERSAL/ESTER
Dyes are compatible with all refrigerants and lubricants

OEM-APPROVED
Choosing a PAG dye that is OEM approved by automotive manufactures will not void any vehicle warranties. **Look for the label before you buy.**

UNIVERSAL/ESTER
A/C dyes will not impair lubricant properties, resulting in diminished viscosity and lubricity
